Performance to 30 April 2026, in GBP, total return, source: Saltus + Ani.

*Measured over 5 years (monthly). **Measured monthly. ***Underlying Fund Charges. **Short term ARC data are estimates and are likely to be revised.**

Past performance cannot be reliably used to predict future returns. Investments do not guarantee a return, the value and the income from them can fall as well as rise. You may not get back the amount originally invested.

Performance shown is of the Saltus model portfolios. Actual client performance may differ. Performance is shown net of an assumed 0.20% investment management fee, and all third-party fund charges. Other charges may apply depending on the assets under management and agreed service level which may reduce the figures quoted.

Global Market

What happened last month?

- Global equities rallied strongly in April despite oil exceeding \$110 per barrel. US equities led developed markets, with gains of over 10% in local terms as AI-related technology stocks and growth names rebounded sharply. Emerging market equities outperformed, gaining 13.3% in local currency. The UK lagged developed markets, given the index's underweight to the technology sector and growth.
- Government bonds were broadly flat, given the renewed inflation fears due to the rise in energy prices. UK gilts (-0.5%) underperformed global bonds (+0.3%).
- ARC indices were revised for Q1. ARC Cautious (+0.6%) was revised upwards, while Balanced (-0.3%), Growth (-1.0%) and Equity risk (-1.7%) were revised downwards.

Positives:

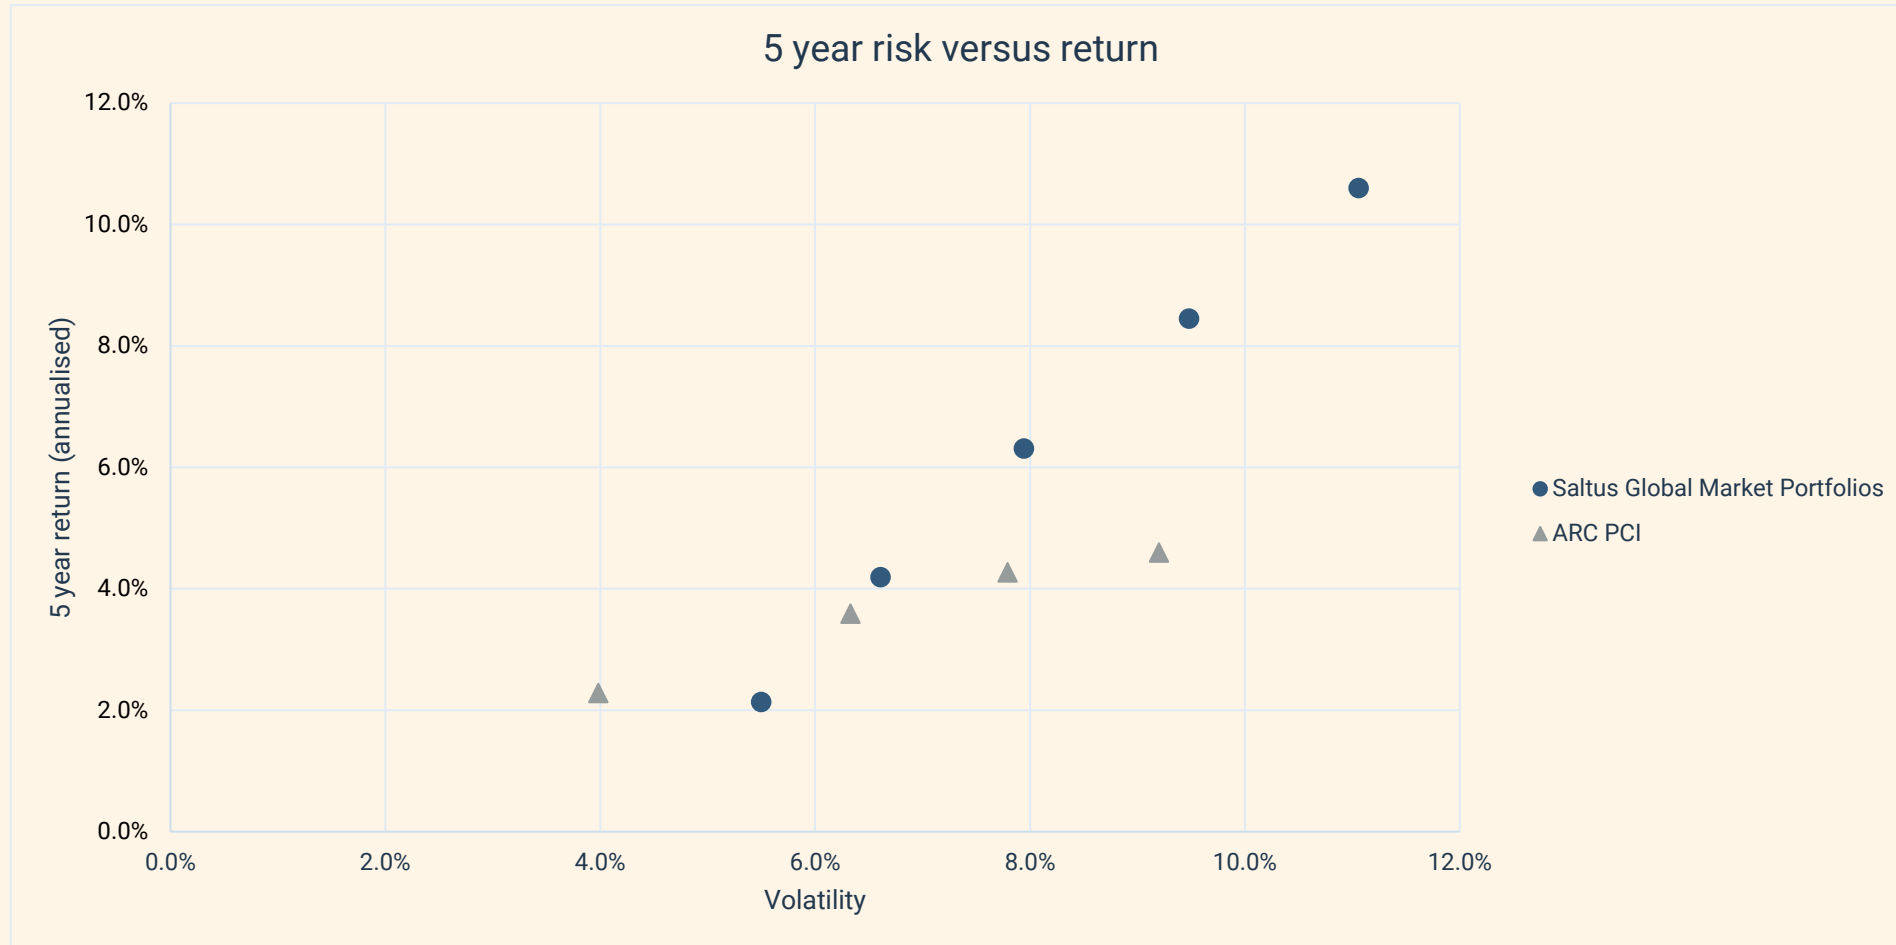

- Emerging Market equities outperformed developed market equities.

Negatives:

- The growth factor outperformed the value factor in April.
- Smaller companies underperformed larger companies.

Performance to 30 April 2026, in GBP, total return, source: Saltus + Ani.

Inception Date 31/10/21. *Measured over 3 years (monthly). **Underlying Fund Charges. **Short term ARC data are estimates and are likely to be revised.**

Saltus in-house funds pay quarterly distributions. Ex dividend dates: 28/02, 31/05, 31/08, 30/11. Dividend payment dates: 01/04, 01/07, 01/10, 01/01.

Past performance cannot be reliably used to predict future returns. Investments do not guarantee a return, the value and the income from them can fall as well as rise. You may not get back the amount originally invested.

Performance shown is of the Saltus model portfolios. Actual client performance may differ. Performance is shown net of an assumed 0.25% investment management fee, and all third-party fund charges. Other charges may apply depending on the assets under management and agreed service level which may reduce the figures quoted

Managed Plus

What happened last month?

- Global equities rallied strongly in April despite oil exceeding \$110 per barrel. US equities led developed markets, with gains of over 10% in local terms as AI-related technology stocks and growth names rebounded sharply. Emerging market equities outperformed, gaining 13.3% in local currency. The UK lagged developed markets, given the index's underweight to the technology sector and growth.
- Government bonds were broadly flat, given the renewed inflation fears due to the rise in energy prices. UK gilts (-0.5%) underperformed global bonds (+0.3%). The risk on environment saw credit outperform rates. Emerging Market Debt outperformed both high yield and investment grade credit.
- ARC indices were revised for Q1. ARC Cautious (+0.6%) was revised upwards, while Balanced (-0.3%), Growth (-1.0%) and Equity risk (-1.7%) were revised downwards.

Positives:

- Polen U.S. Small Company Growth Fund (+18.5%) and iShares S&P 500 Information Technology Sector ETF (+16.6%) were the strongest performers, capturing the rebound in US growth and tech.
- PGIM Jennison Global Equity Opportunities Fund (+13.3%) and HSBC MSCI Emerging Markets Equity Index Fund (+12.4%) rallied.
- MSIM Emerging Markets Debt Opportunities Fund (+3.9%) recovered strongly within fixed income.
- Liontrust European Strategic Equity Fund, a European equity long/short fund, rallied 7.1%.

Negatives:

- Konwave Gold Equity Fund and iShares Physical Gold ETC declined by -2.7% and -2.8%, respectively.
- Trium Alternative Growth Fund declined by -2.9%, detracting from performance.
- Royal London UK Government Bond Fund declined by -0.7% as Gilts struggled in April.

Important information

What is the ARC PCI benchmark?

It is an independent benchmark that assesses us against all of our competitors. We have no input on the benchmark and how the data is presented. ([ARC Private Client Indices \(PCI\): Asset Risk Consultants](#))

Who is included in the benchmark?

Nearly every major wealth manager in the UK is included in the benchmark. For a list of all the firms included please [click here](#).

What is the 'Sharpe Ratio'?

This demonstrates the level of return generated per unit of risk taken. It is a useful identifier to determine if a manager is rewarded for the risk they are taking.

Past performance cannot be reliably used to predict future returns. Investments do not guarantee a return, the value and the income from them can fall as well as rise. You may not get back the amount originally invested.

Sharpe ratio is calculated using the following formula:

$$\text{Sharpe Ratio} = \frac{\text{Portfolio Returns} - \text{Risk Free Rate}}{\text{Portfolio Volatility}}$$

All components are calculated as annualised figures using 5-year monthly data. The risk-free rate used here is the Bank of England Base rate.

Thank you
